

## Long Term Training (one month)

Course Fee: Tk. 5,000.00 for each course

- **TDI Certified Teacher (TCT):** This is a comprehensive course on teaching skills in modern times. Teachers would learn about child psychology, various teaching approaches, evaluation techniques and use of ICT in teaching.
- **Early Childhood Education:** This course focus on child development and integration of education with it. Teachers and parents will be taught about how to deal with young children in proper psycho-social ways. Health and materials is also included in this course.
- **Training on Autism:** This course deals with the concepts and development of autism, various types of autism, assessment and means of interventions to deal with autistic children. Use of occupational and speech therapy for autistic children is also included in this course.
- **Speech and Language Therapy (SLT):** Speech and language development is a spontaneous process but for some unknown reasons these qualities lack in few children. How and why it happens and how technologies can be used is the central focus of this course. This course provides functional skills of SLT to the parents and teachers of these children.
- **Training on daycare services:** Daycare is specialized service to infants and young children. It is more than babysitting activities where infants' developmental aspects are addressed by trained professionals. This course addresses all those functional skills.
- **Any other customized course:** Customized courses are designed as per demand of the organizations and individuals. Like training on Science teaching, language, art and culture or any other subject. We can serve individual needs as well by organizing training for one or more participants only in the desired venue.
